

Deflex Fugensysteme GmbH is one of the key global names when it comes to the production and sale of joint profiles. We are a medium-sized company with over half a century of experience in developing joint systems and sealings of all kinds, with optimal implementation and leveraging cutting-edge technology. Our company commenced as a construction industry supplier but subsequently decided to focus on the field of joint systems.

We complete all kinds of construction joints and offer solutions in all the following fields:

- Joint profile
- Wall profile
- Floor profile
- Ceiling profile
- Roof profile
- Design joint covering
- Building sealing
- Flat roof sealing
- Structural sealing of all kinds
- And much more

BRIDGE BEARINGS

by

company of

FRIEDHELM ERLEBACH
SALES MANAGER MIDDLE EAST

Gumba is a term for technical competence in the field of bridge bearing applications for more than 40 years. Through the dedication of Gumba's employees it has become a well known trade mark in the world wide construction industry.

Our engineers support our customers, as well as design engineers, authorities and construction companies in both the theoretical and practical selection of the correct bridge bearing, providing a service beyond that of the design and manufacturing of elastomeric bearings.

Despite a growing internationalisation, the decision to manufacture our products only in Germany has been proven correct. "Made in Germany" is still recognised worldwide and appreciated for high quality products.
